EDUCATION

Chitkara University — Rajpura, Punjab

Expected: May 2029

B.E. in Computer Science & Engineering | Specialization in AI & Future Technology

CGPA: 9.32 / 10.0 (through Semester 3) | SGPA: 9.34 (Sem 1) · 9.15 (Sem 2) · 10.0 (Sem 3)

Relevant Coursework: Object-Oriented Programming, Data Structures, Discrete Mathematics, Operating Systems & Linux Fundamentals, Foundations of AI Algorithms, Artificial Intelligence Fundamentals, Front End Engineering, Web Technologies, Computer Architecture

PROJECTS

Study Shelf — A Digital Learning Organizer

2026

HTML5 · CSS3 · JavaScript · React.js

GitHub: github.com/gargi-dev-jpg/Study-Shelf-A-Digital-Learning-Organizer

- Built a digital bookshelf that helps students organize and access subject-wise notes and study resources in one place.
- Implemented search, bookmarking, and progress tracking features to make study material easy to find and follow.
- Delivered a responsive, user-friendly interface using HTML, CSS, JavaScript, and React.

Resume Analyzer — RAG Pipeline

2026

Python · RAG · Ollama · Qwen3 0.6B

- Built a Retrieval-Augmented Generation (RAG) pipeline for resume analysis using Ollama with the Qwen3 0.6B model.
- Runs the language model locally through Ollama, without relying on external AI APIs.

FlavorDex — Recipe Finder Web Application

Jan 2025 – May 2025

HTML5 · CSS3 · Vanilla JavaScript · REST API Integration

- Architected a fully responsive recipe-finder application by integrating TheMealDB REST API to fetch and render real-time recipe data dynamically.
- Engineered advanced frontend features — including keyword search, multi-category filtering, sorting, and modal-based detail views — enhancing user discoverability and engagement.
- Implemented persistent favourites management using localStorage, enabling seamless cross-session user experience without a backend.
- Leveraged async/await and the Fetch API for non-blocking asynchronous data handling, improving application performance and reliability.
- Crafted a pixel-perfect responsive UI using CSS Grid, Flexbox, keyframe animations, and media queries to ensure compatibility across devices.

Introduction to Artificial Intelligence — Educational Website

Aug 2024 – Dec 2024

HTML5 · CSS3 · Responsive Design

- Designed and developed a multi-section educational website on Artificial Intelligence, translating complex technical concepts into accessible, reader-friendly content.
- Constructed a structured navigation system and modular content layout, improving overall user experience and information hierarchy.
- Applied modern CSS techniques — including gradient styling and responsive card-based design — to deliver a polished, professional user interface.

Hostel Room Allotment System

Jan 2025 – Apr 2025

C Programming · File Handling · Structured Programming

- Developed a menu-driven console application in C to automate hostel room allocation, student management, fee tracking, and complaint resolution for an institution.
- Implemented persistent data storage using binary file handling, ensuring reliable record retention without a database dependency.
- Designed modular program architecture with distinct functional components, demonstrating strong principles of structured programming and code maintainability.

HACKATHONS

Smart India Hackathon (SIH)

- Selected at the university level in the Space Technology category.

University-Organized Hackathon — Rental Agreement Checker

- Worked on the Rental Agreement Checker, an AI-based tool that reviews rental agreements clause by clause.

EXTRACURRICULAR ACTIVITIES & LEADERSHIP

University-Level Academic Achiever

2024 – Present

- Maintained a CGPA of 9.32 across three semesters, including a 10.0 SGPA in Semester 3, demonstrating consistent academic excellence and strong time management across coursework in programming, mathematics, and AI.
- Actively pursued industry certifications alongside full-time academics, reflecting initiative and a self-driven approach to continuous learning.

WORK EXPERIENCE

No formal work experience yet — actively seeking internship and co-op opportunities in software development and AI.

SKILLS & CERTIFICATIONS

Programming Languages: Python, Java, C, C++ (Basics)

Core CS Concepts: Object-Oriented Programming (OOP), DBMS, SQL

Web Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, REST APIs, Fetch API, localStorage

Tools & Concepts: Responsive Web Design, File Handling, Async Programming, RAG / Ollama, Git (basic)

Languages: English (Professional), Hindi (Native)

Certifications: Microsoft Azure AI Fundamentals (AI-900) | Microsoft Azure Fundamentals (AZ-900) | Microsoft Azure Data Fundamentals (DP-900) | Infosys: Python Fundamentals | Infosys: HTML5 | Attended CapablIndia Agentic AI Workshop
